

MINIPAN SRL

MINIPAN GIVE TASTE A SHAPE

FROM BISCUIT TO BREAD, BAGELS, BREADSTICKS and DOUGH SHEETING: MINIPAN IS A STRONG AND INNOVATIVE MANUFACTURER IN THE BAKERY AND CONFECTIONERY MARKET.

With over thirty years of experience, and a constant focus on total quality and technological innovation, Minipan has reached a leadership position in many segments of the Italian bakery and confectionery food industry. All mechanical components have been recently re-designed to make each machine more precise and silent, while the new models are extremely safe and built in full respect of the international rules. Minipan's machines are suitable for the production (forming) of the following products: biscuits; pastry and different bakery products; bread specialities, including typical regional products and international ones; bread substitutes such as breadsticks of different designs and shapes; bagels, schiacciatine and other special bread based snacks. Our machine range includes: Comby, depositor, extruder and wire cutter; Syr, extruder for a variety of biscuits featuring automatic placement on baking pans; MiniPan Inox, automatic forming machine for horns and "ferrara bread"; Griss inox and Minigriss, automatic forming machines for breadsticks (grissini); O-Matic inox, automatic forming machine for bagels; Raff, automatic dough refiner: able to refine chunky dough and is particularly efficient in the lamination of flat breads, cracker, grissini and bread snacks; Coextruder for filled biscuits. Among customized machines for bread snack production there are our automatic SCRAP FREE® lamination system and breadstick production line.
