

UTECO-CONTEC SRL

ATOMATIC STORE AND PICKING SYSETM FOR DEEP-FREEZ ROOM UNTIL-30°C

Thank to its experience all through the years uteco-contec is able to carry-out new solutions for automation store and picking system, especially for low temperature until -30°C:

The growing request for automation in the deep-freez pusced our factory to develop new dedicated technology, more performant and reliable in this field.

Improve working conditions, check production just in time, and above all reduce the manufacturing cost are the most advantages of this system.

Portal-robot for deep-freeze picking room -30°C (Bofrost)

Traslo elevator with anthropomorfe robot on board for deep-freeze picking room – 30°C (Rigoni)

Fork trasloelevator for pallet in deep-freez room – 25°C (Panificio S.Francesco)

I'm glad to introduce you uteco-contec a leader of "Industrial automations".Set-up in 1968 manufactures its plants for the main industrial filelds making automation and transport system.
